App icon · horizontal & stacked lockups · K mark · monochrome · colour system · usage rules

Locked 22 August 2026 — supersedes all previous versions

App icon

Master at five common rendered sizes

300px · 180px · 120px · 72px · 44px

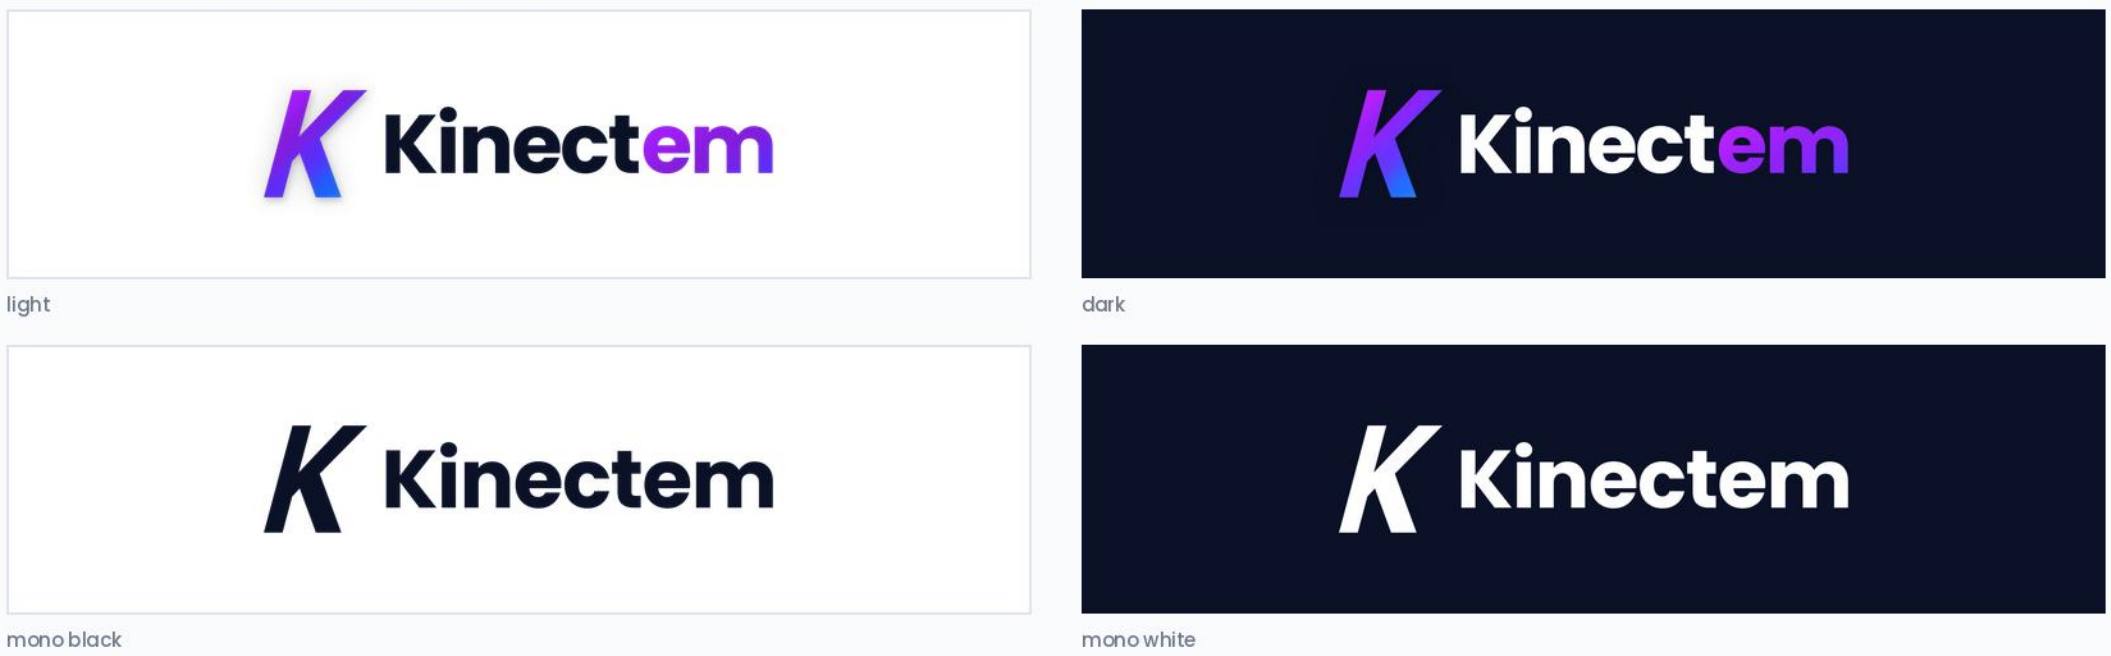

Surface gradient with dark shoulders, magenta corner accent, ambient halo and contact shadow behind the K.

K optically centred — margins L313 R286 T280 B304.

41 platform exports in icon_suite/ · favicon set in favicon/

Horizontal lockup

Primary logo · headers, email signatures, business cards

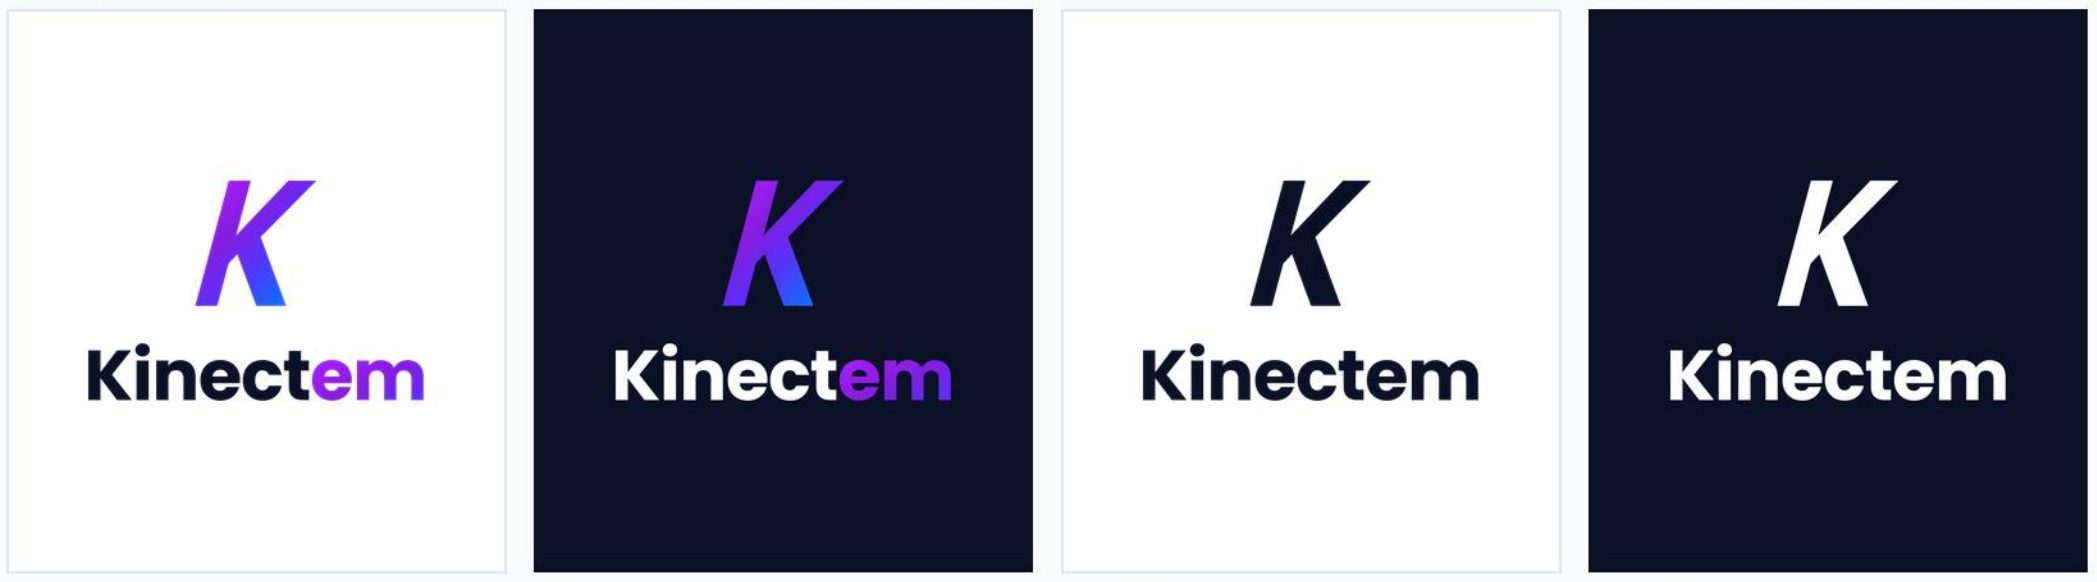

light · dark · mono black · mono white

No-shadow cuts of light and dark also supplied — use those on photos or mid-tone colours, where a travelling shadow reads wrong.

Revised 22 Aug 2026 — the K mark is now centred on the wordmark cap band; it was previously hung from the top. Stacked lockups unchanged.

Stacked lockup

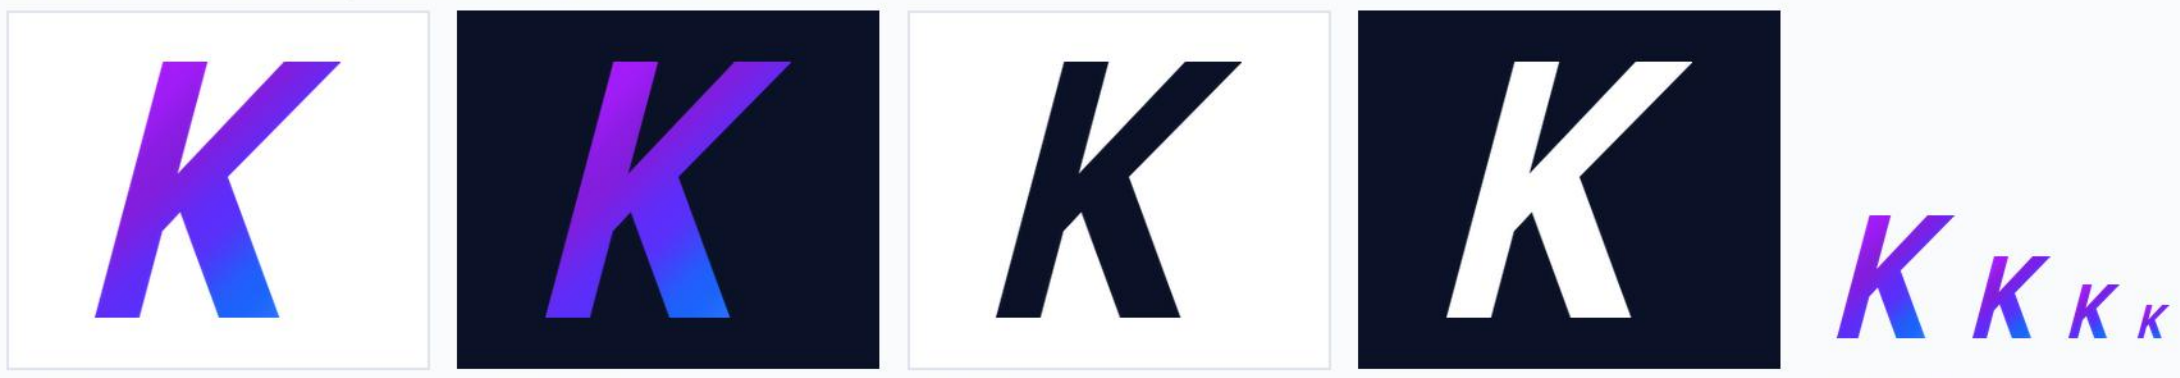

Square spaces · social profiles · hero placements

light · dark · mono black · mono white

K mark

Use alone when the brand is already established · avatars, watermarks, favicon

gradient · gradient on dark · solid black · solid white · 96 / 64 / 42 / 26px

Colour system

One ramp, two applications. The icon is a surface; the K mark and 'em' are glyphs — glyphs drop the dark shoulders.

SURFACE · app icon, filled blocks

#1C0A56 · #8B22F0 · #6A2BF8 · #4A34F5 · #2563EB · #0C2A8C

GLYPH · K mark, 'em', thin shapes

#FF1F9E · #9B22E8 · #7E22CE · #5B32E8 · #2563EB · #3B82F6

Royal purple #7E22CE	Indigo #5B21B6	Deep violet #4C1D95	Royal blue #1D4ED8	Bright blue #2563EB
Navy #0B1228	Magenta #FF1F9E accent only, max ~12%	Ink violet #1C0A56 shoulder, surfaces only	Ink blue #0C2A8C shoulder, surfaces only	Shadow violet #3A1470 shadows on light bg

Usage rules

1. One axis. Every gradient runs 135°, top-left to bottom-right. Magenta at the origin, blue exits.
2. Magenta is an accent, never a stop. Max ~12% of any surface, always at the leading corner or the tip of a glyph.
3. Shoulders are surfaces-only. #1C0A56 and #0C2A8C give the icon its depth — they never touch a glyph.
4. Small objects get a compressed slice, not a shortened ramp. 'em' and the favicon use 0–58% of the glyph ramp.
5. Shading is strong on the icon, light on the lockup. The wordmark gets none.
6. Shadows on light backgrounds are violet-tinted (#3A1470), never gray.
7. Lockup spacing is fixed by ratio, not pixels — it holds at any size.

Geometry & type

Wordmark · Poppins Bold, -0.016em tracking, converted to outlines in all SVGs

K mark · custom geometric K, 15° forward lean, skew baked into the coordinates

Lockup · gap ÷ K-mark height = 0.176 · K-mark height ÷ cap height = 1.858

Lockup · K mark centred on the wordmark cap band — it rises above the cap line and drops below the baseline by the same amount

Formats · SVG (vector, scales infinitely) and PNG (raster, at all common sizes)
